groups such as lesbian, gay, bisexual, trans and queer groups, for which limited data are available. The combined impact of multiple marginalized identities on health is also not taken into account in this analysis, but it is likely that that will...

quality: life expectancy; self-rated health; low birthweight; diabetes; length of stay in hospital; rate of potentially avoidable hospitalizations.

gay, bisexual, trans and queer (LGBTQ) groups, immigrant groups, and low-income groups. Specifically we have compiled papers published in both academic and non-academic literature on six indicators of population health and service...
